Een podcast is een audio-uitzending waarbij het geluidsbestand op aanvraag wordt aangeboden door middel van webfeeds. Dankzij de introductie van draagbare mp3-spelers zoals de iPod was deze vorm van uitzenden snel populair onder radioamateurs. De term podcast is dan ook een samentrekking van iPod en broadcast (Engels voor 'uitzenden').

<https://nl.wikipedia.org/wiki/Podcast>

De podcast is ontstaan in 2004. Niemand minder dan onze eigen "podfather" Adam Curry wordt gezien als een van de drijvende krachten achter de podcast. Hij is niet zozeer de uitvinder, maar hij maakte het als eerste mainstream met zijn programma "The Daily Source Code". Dave Winer wordt gezien als de daadwerkelijke bedenker / uitvinder van de podcast.
